PELARGONIUMS.

Victor.—This Pelargonium increases daily in popularity; is grown in Chicago almost to the exclusion of all others. It is certainly the finest dark variety we have ever seen. 90c. per doz.; \$6.00 per 100.

Freddie Heintz.—This was largely sold a few seasons ago under the title "Monthly Pelargonium." They are in no way entitled to this name with us, but they certainly do come in bloom earlier and stay in bloom longer than any other variety. It is a very profuse bloomer, the flowers almost hiding the foliage, and is very desirable. The flowers are white, margined with carmine—very beautiful. We have a fine stock. \$1.00 per doz.; \$6.00 per 100.

Fine varieties, mixed, without labels; very strong; ready for 4-inch pots. We have an immense stock and can offer at very low prices. 40c. per doz.; \$3.00 per 100. Large plants of any of the above ready in April. Prices on application.

VERBENAS.

We offer again this season, splendid strong stock, perfectly clean and healthy. Our experience has taught us to avoid a long list of varieties, and to grow a few kinds carefully selected. Many of our customers grow seedlings,—the colors of these run largely to blue, mauve and majenta, with a decided scarcity of clear pink, scarlet or white, and have to buy these sorts to make good their assortment. We therefore grow an extra large amount of these colors, selecting Beauty of Oxford as best pink, Miss Arthur the finest scarlet, Crystal and one other as best white, and can fill orders for these varieties without extra charge. Our stock is in grand shape and we guarantee satisfaction.

Aurora Borealis.—Red striped white.

Beauty of Oxford.—Finest pink.

Climaxer.—Extra large scarlet, white eye.

Crystal.—White.
